Amendments to the Specification

Please replace paragraph at page 10, lines 22-32 with the following amended paragraph:

A memory 53 also may store, among other things, a variety of lists and databases 55 that can be used to scan for and locate an acceptable control channel for the wireless terminal 40. These lists and databases may include a DCCH History Table (DHT) and an Intelligent Roaming Database (IRDB). These and other tables can be used to perform an IR search such as those disclosed, for example, in commonly assigned U.S. Patent Application No. 09/656673, by Anderson et al. (Anderson), filed September 7, 2000, entitled Methods and Systems for Scanning and Locking Onto A Control Channel Via a Multi-Level Search in a Wireless Communications System, the entire disclosure of which is incorporated herein by reference.
